6. Click 'Activate' and make sure the Activate button is green. If it is red, either the register has already been activated for this new version or was never activated initially.

7. Close and reopen the app **TWICE** > Enter the PIN to sign in > Check the register name > If it is correct, you're good to go.
8. Delete the old app.

\* Please ensure that the main language of the iPad is English to avoid any issues.

1. Go to iPad settings.
2. Click 'General' > 'Keyboards' > Ensure only English is listed. If there is more than one language, swipe right to left to delete the extra languages.
3. Go back to 'General' > 'Language & Region' > Make sure only one language is set, and set the region to 'United States'.
